4. Sensing System: LiDAR & Depth Camera

A Leishen LSLiDAR is installed on all Mecabot variations with either the N10 or M10 model being used. These LiDAR's offer a 360 degree scanning range and surroundings perception and boast a compact and light design. They have a high Signal Noise Ratio and excellent detection performance on high/low reflectivity objects and perform well in strong light conditions. They have a detection range of 30 metres and a scan frequency of 12Hz. This LiDAR integrates seamlessly into the Mecabots, ensuring all mapping and navigational uses can be easily achieved in your project.
